

# THE BENEFITS OF USING TRANSIT MESH

Transit mesh is one of Locker Group's most popular products. Here are a number of features you can benefit from when working with this versatile material.

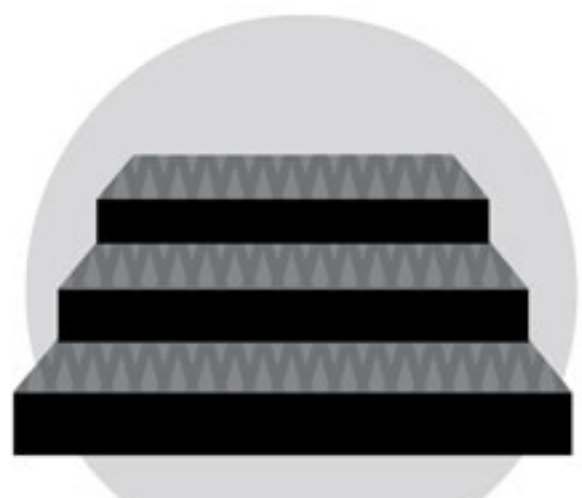

## TRANSIT RANGE

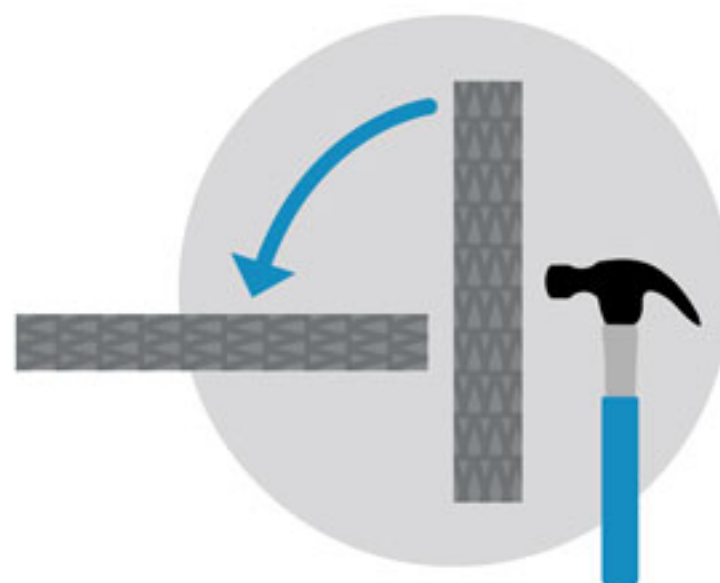

**Stylish**

**Can be installed either as a curtain or a fixed feature**

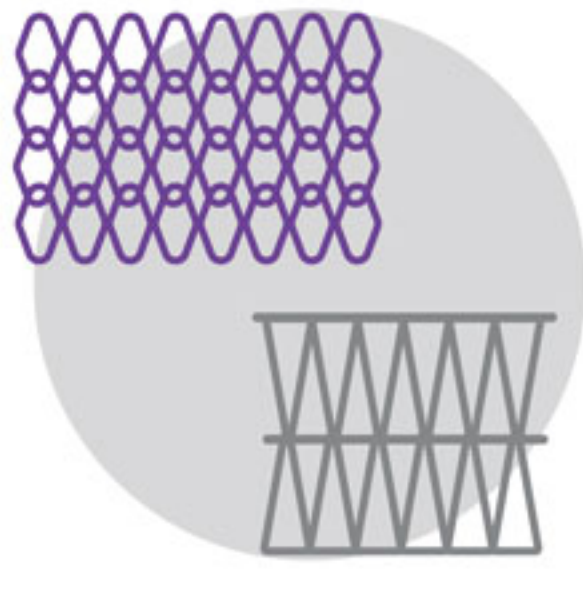

**Fall arrest in stairwells**

**Can be installed vertically or horizontally for a completely different effect**

## A VERSATILE PRODUCT

**Manufactured in various designs for different looks; open areas and wire profiles (flat or round)**

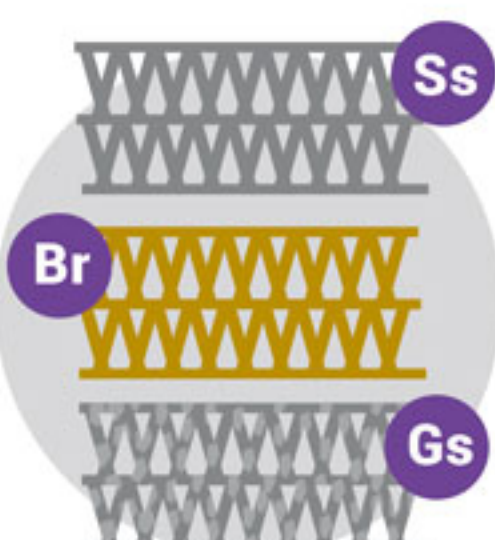

**Can be used outdoors as a screen or facade if tensioned**

**When tensioned, the length is limitless**

**Full range of fixing arrangements available to compliment the Transit range**

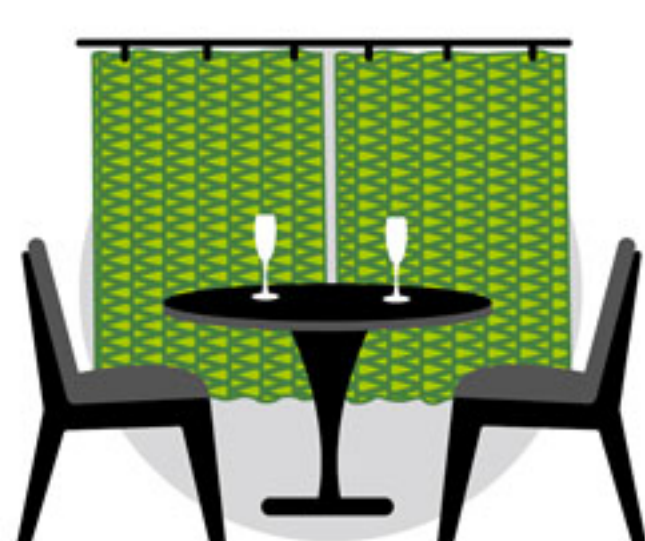

**Manufactured in Stainless Steel, Brass or Galvanised steel**

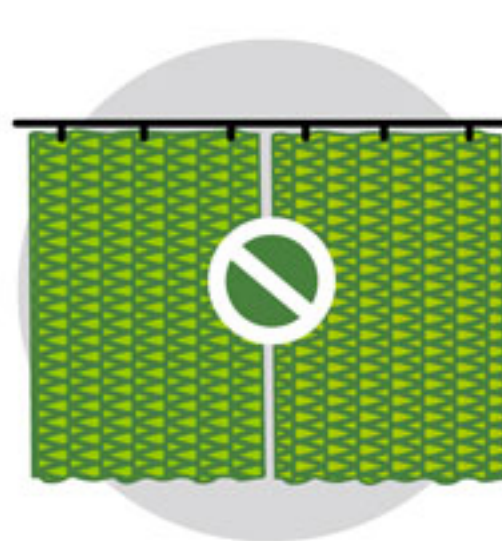

**Can even be fashioned into a sculpture**

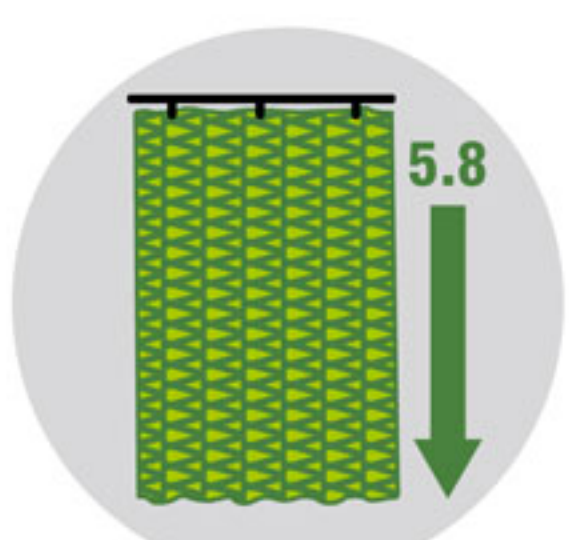

## TRANSIT CURTAINS

**Add character to a room, define smaller spaces or hide ducts and electrical amenities**

**Can be used for extra security. Cordon off areas whilst still allowing air and light to flow through freely**

**We have produced up to 5.8mtr drop based on variations, such as load bearing beams and installation access**

**If you're interested in installing transit mesh, contact Locker Group today.**
